FEATURES:

STP CCTV is the intelligent video surveillance camera specifically designed to be integrated into the **SmarTekPole** product, able to control and manage all road control problems both for safety and traffic control aspects.

STP CCTV has a versatile and affordable camera that offers excellent image quality at the maximum frame rate with a resolution of 5 megapixels and in 16: 9 format. Fully equipped with Lightfinder, OptimizedIR and Forensic WDR.

Forensic details are captured even in difficult lighting conditions, including low light and strong backlight. Resistant to any type of external temperature, this sturdy and resistant camera allows you to always obtain bright and clear images by automatically adapting to all lighting variations of day and night. **STP TVCC** offers easy installation with remote zoom and focuses control to do fine image adjustment.

With configurable streaming, local I / O, the possibility of installing sophisticated software onboard such as AID (Automatic Incident Detection) or EWC (Environment Weather Condition) analysis, this device allows you to improve the video surveillance information giving the installation a greater technological profile.
